Dear parents/carers,

As you are aware our access in and out of the school playground this year has caused congestion during periods of high footfall. We are aware of these difficulties and are currently investigating solutions. With support from one of our parents we are proposing the following solution from after the Easter holidays. We will speak to the children in assembly (Thursday 6th April) and share with them how this will work. The aim of the system is to reduce the slope to the same width as the gate to reduce crowding around the gate and subsequent road.

During the first week back school adults in high visibility jackets will be around to help direct and at any point reflections and suggestions would be welcomed via email info@sa.cabot.ac.uk to help us improve the system further.

As we made you aware in our previous letter we are unable to use the 'bottom gate' as it is classified as a vehicle access gate, and due to the fact that it has no run out barriers on the road. We are however, continuing to petition the council to change the use of the vehicle gate to an entry only gate to make the system of entering and exiting one way. We are collecting any observations of current provision, from staff, parents/carers and pupils. If you would like to support us with these please email the above address by Monday 24th April so we can use them to support our recommendations.

Thank you support,
Regards, Rachel Scammell
